stiaivelli irio

"I have worked with Stiaivelli Irio for many years, with reliable and high quality products and services, offering an outstanding service through a responsive customer relationship."

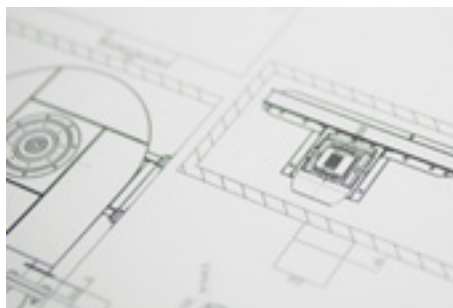

A Family Company, Since 1946

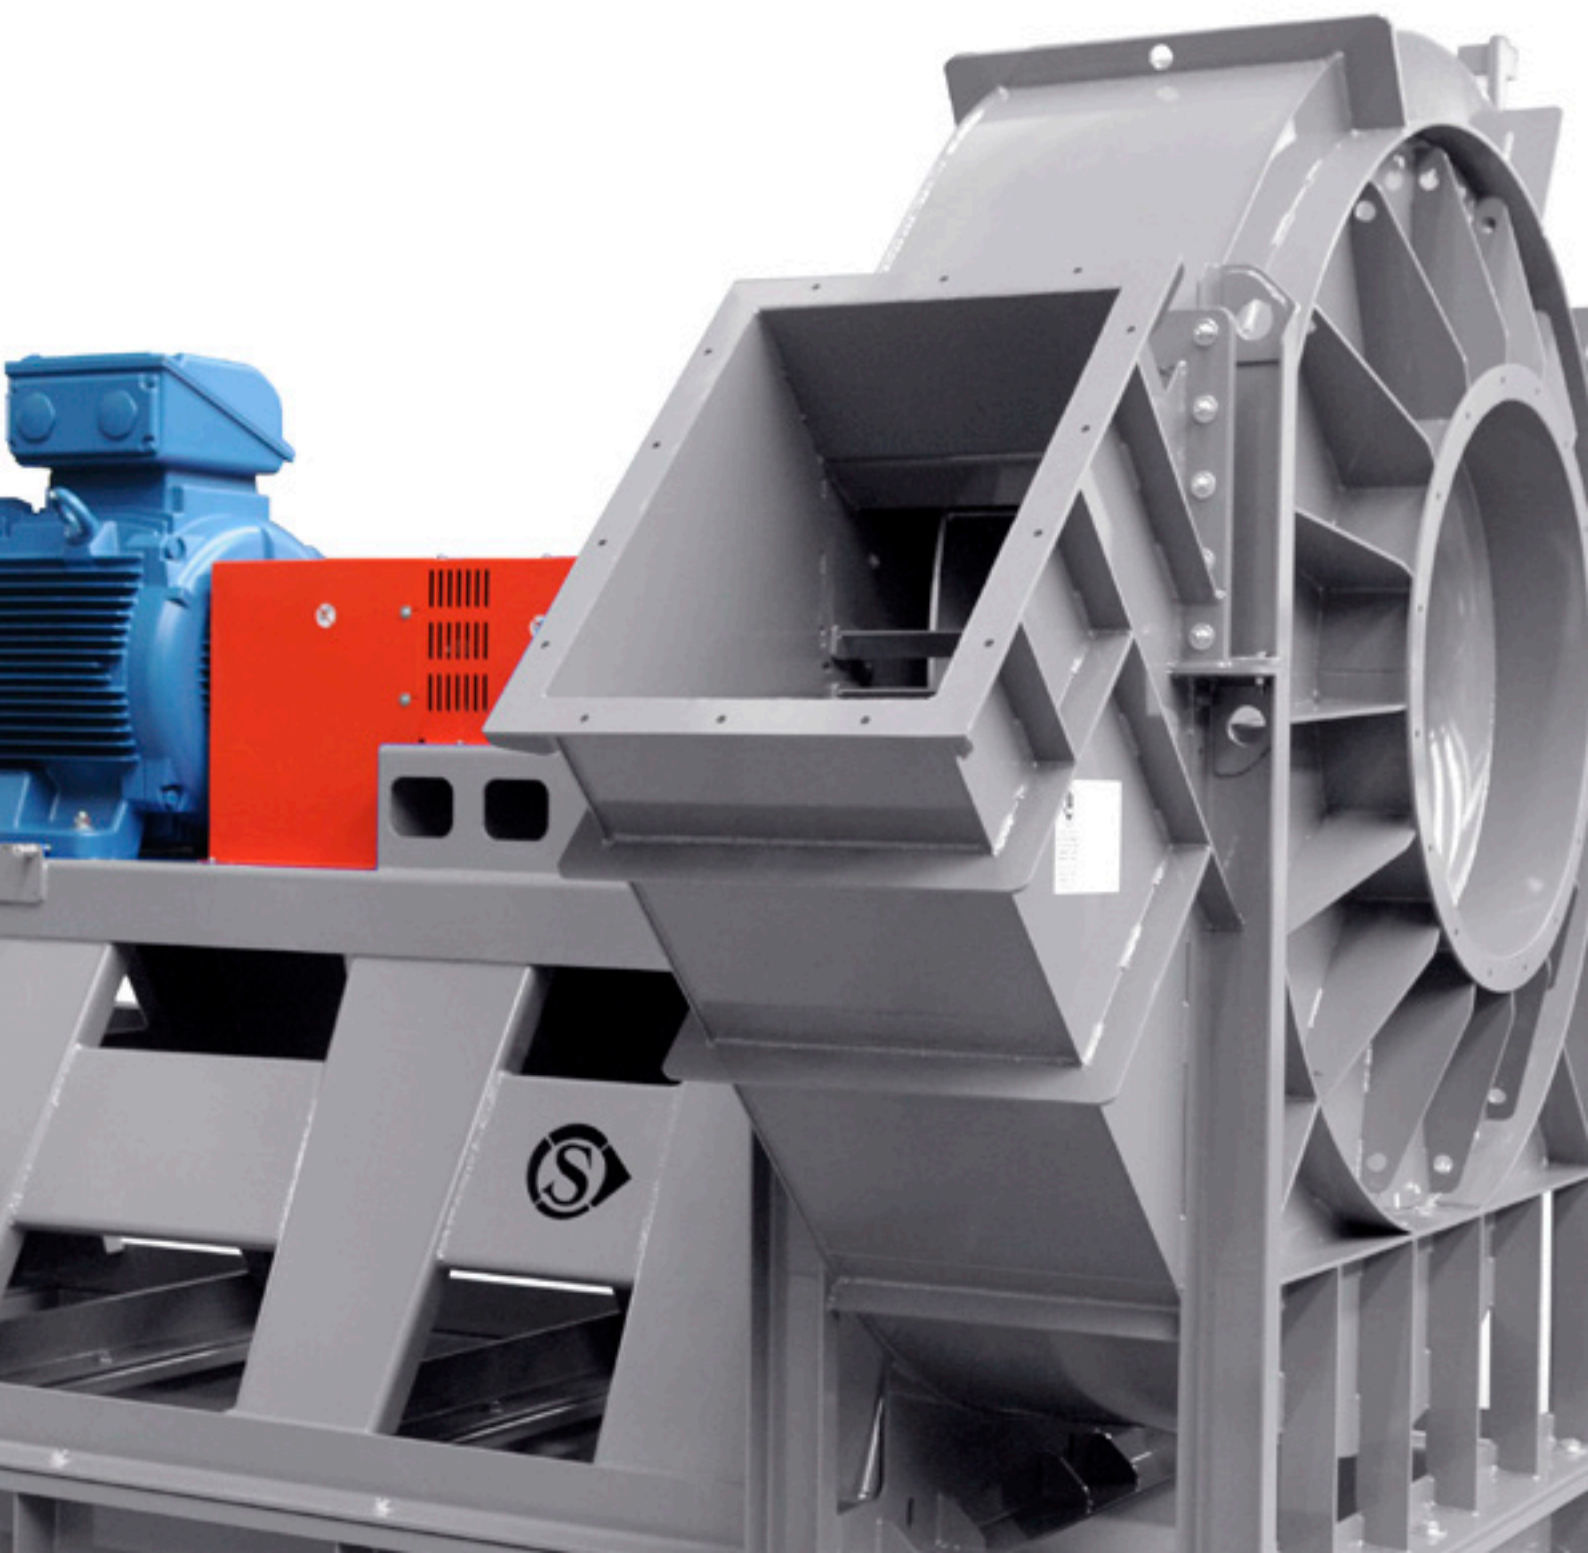

Our company has always provided our customers with reliable and **high-grade products and solutions**, offering an outstanding service through a responsive customer relationship, working proudly with passion and creativity.

Since 1946 we have promoted **the quality of "Made in Italy"** for our products all over the world, and since the '60s paved the way for industrial ventilation in Italy, a sector in which the company became a benchmark.

We maximize the value of our products through advanced technology, experience, and quality of our work so we realize state-of-the-art **Custom Industrial Fans and Blowers**.

We are also committed **to work in a responsible and sustainable way**, by evaluating new solutions through which we can contribute to global efforts to preserve the **environment**, making the world a better place for the future generations.

Top-Notch Structure for Heavy-Duty Applications

Our multi-purpose centrifugal fans are **extremely reliable** and can be manufactured to work properly in case of hot air, gas or dusty fluids at different pressure levels according to customer requirements.

We can provide **customized solutions for virtually any kind of application**, such as mining and steel industry and equip the fans with special accessories.

Along with a top-quality impeller, the reinforced structure of the casing and of all the components, enables a **longer lifetime** and reduces maintenance costs.

An unparalleled attention to details will fulfill any expectation.

Mill and Cereals
Conveying Centrifugal Fan

HVAC Air Handling
Industrial Fan for Dedusting Plant

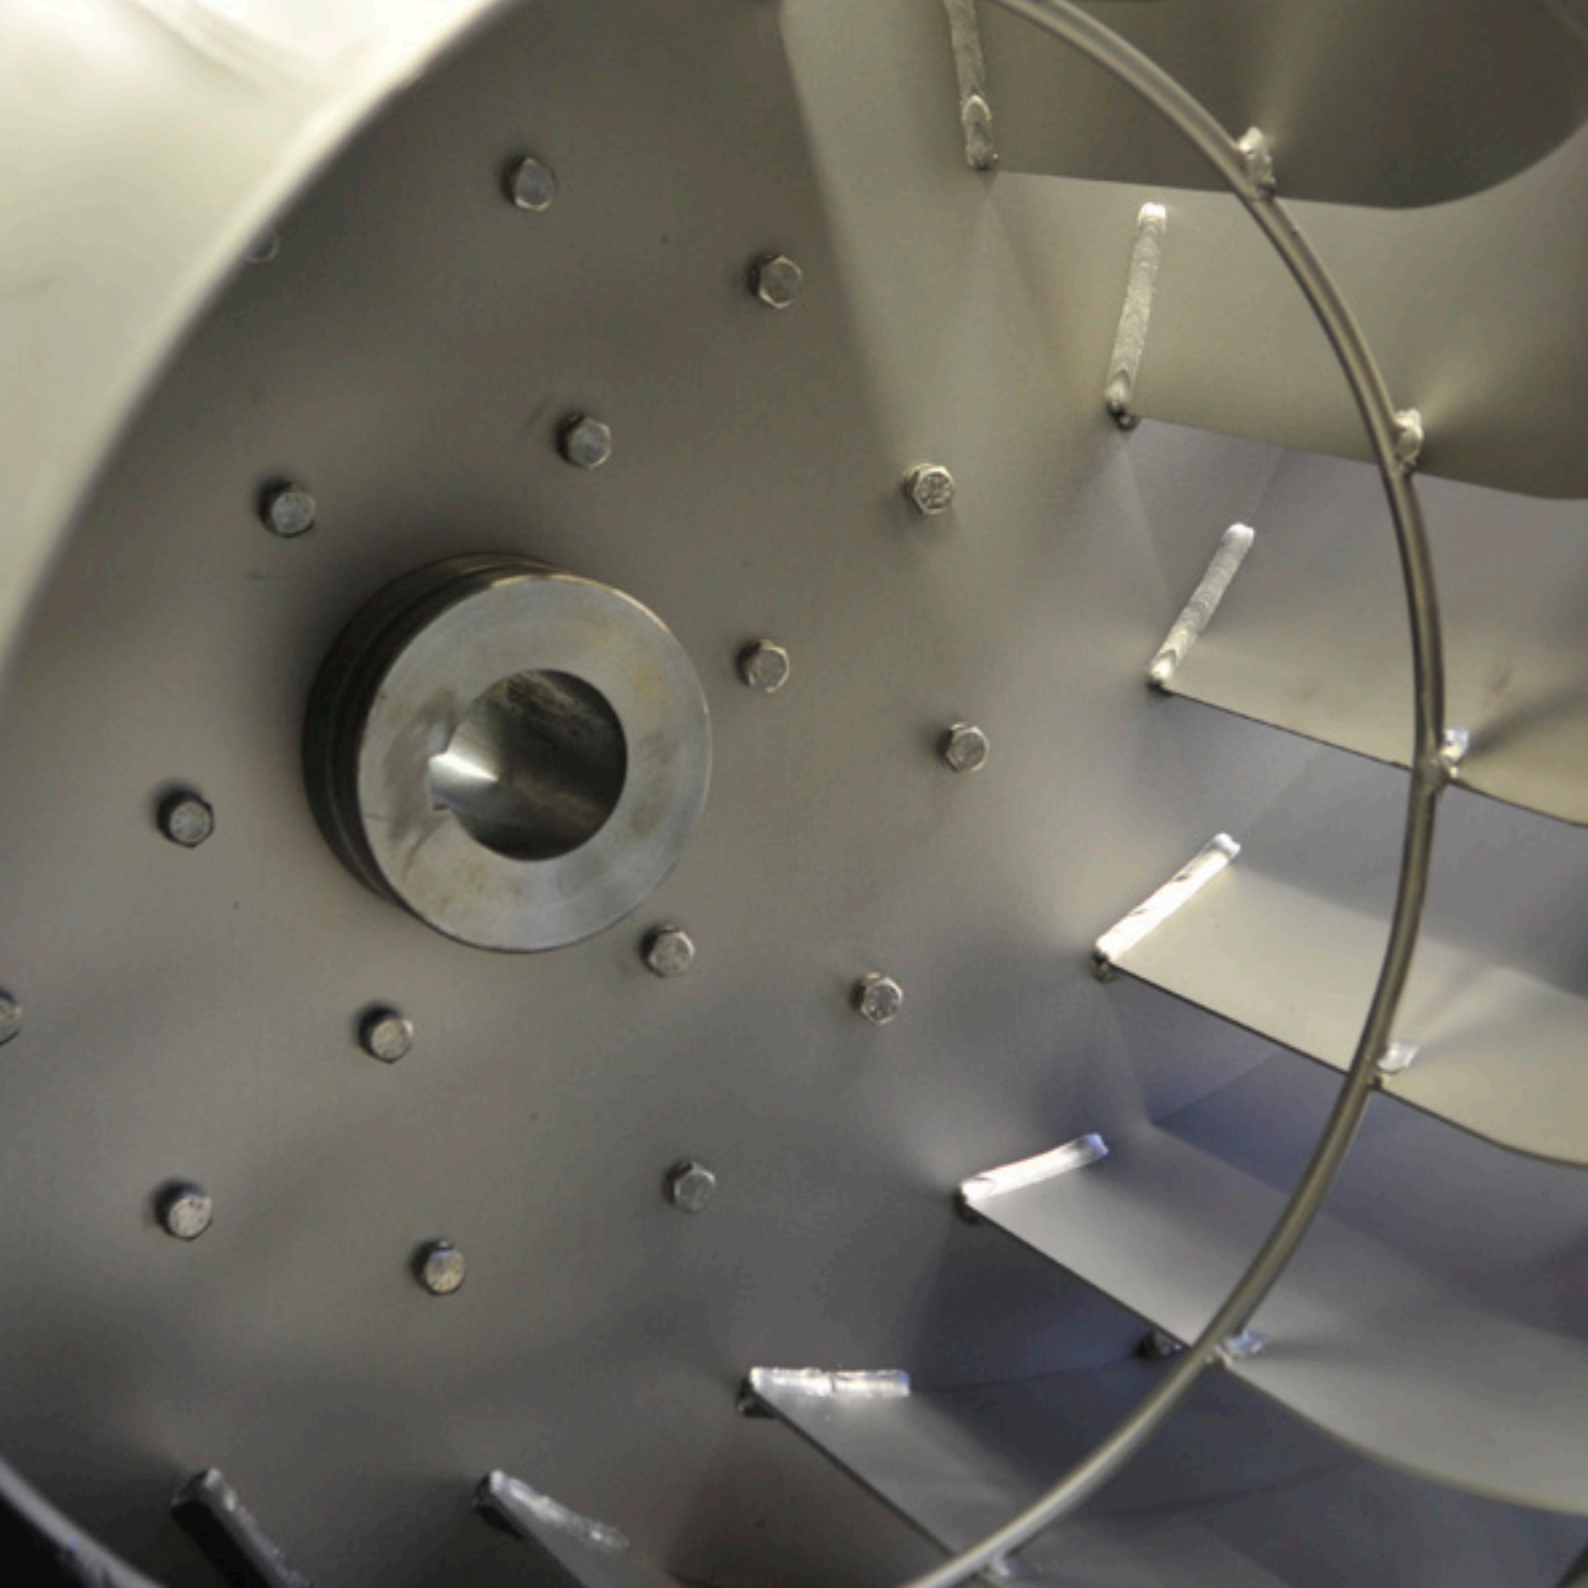

Environmental Sector
Fan for the Suction of Vapours

Cement Industry
Double-Stage Conveying Fan

Customized Centrifugal Fans: Your Tailored Solution

Our **Radial Flow Centrifugal Fans** are conceived and designed to meet the specific requirements of our customers.

Thanks to our accurate selection of materials, we can guarantee **corrosion resistance in harsh environments**, such as chemical industry, by carrying out different surface treatments.

Most of our fans may be supplied in explosion-proof configuration in compliance with **ATEX Directive** for classified areas.
